# Methodology

The analysis and results contained in this report are based on two primary data sources covering the 2021 - 2024 period.

- Audited financial statements of health center corporations reported by fiscal year.
- Uniform Data System (UDS) information as self-reported by health centers each calendar year.

The comparative data sets include aggregated data from audited financial statements and UDS reports from Capital Link's proprietary financial and operational database.

The specific number of health centers included in each comparative data set is listed below.

Data	WY FQHCs 2024	National FQHCs 2024
Financial Audits	5	1,016
UDS Data	5	1,512

## Percentiles

Statistical measures used to describe the financial ratios and trends include the 50th percentile (median), 75th percentile, and 25th percentile. Half (by definition) of the values in a set are greater than the median and half are less. Therefore, the median is not skewed by large or small values outside the typical range as can happen with average figures. The 75th percentile is a value that is equal to or greater than 75 percent of others in the data set. The 25th percentile is a value that is equal to or greater than 25 percent of others.

Run Date: 10/7/2025 12:53:46 PM
